

TurboCAD Furniture Maker v20

64-bit

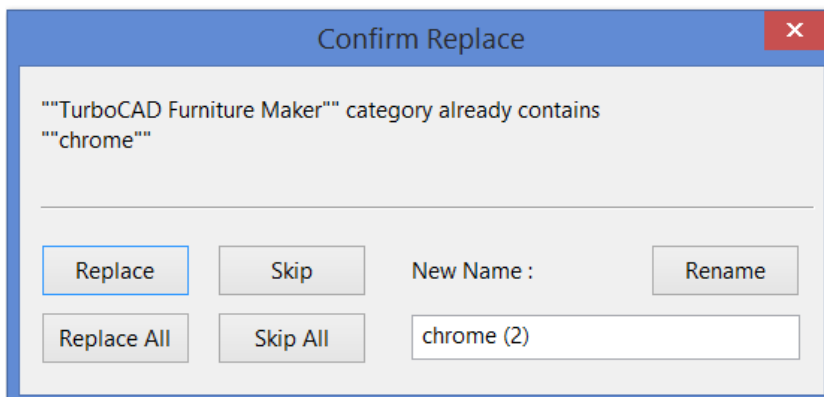

INSTALLATION MANUAL

Installation procedure

Caution:

- **TCFM must be installed under the User Account which has Administrator rights; otherwise, the installation will not be properly carried out.**
- **If you are using TurboCAD 2019 for rendering, it is necessary to install the RedSDK Rendering Plug-in – available from your dealer of TurboCAD.**
- **By default TCFM works in GDI mode (LightWorks render plug-in is needed for rendering). It is possible to work in RedSDK mode each tool should work correctly however there may occur some shortcomings such as missing direction view preview when inserting the camera, missing vector representation for the tool “Composing according to vector”.**
- **We recommend to check the option Shared shaders sets (Options/Advanced Preferences/Shared shaders sets) so that the dialog about Confirm Replace will not show up.**

TCFM 20 is for 64-bit versions of TurboCAD v2019 Professional, Platinum and Deluxe only.

Installation of TCFM 20 from an FTP

Save all installation files of program TCFM on your PC:

 TCFM_v18.0_US_setup_64bit

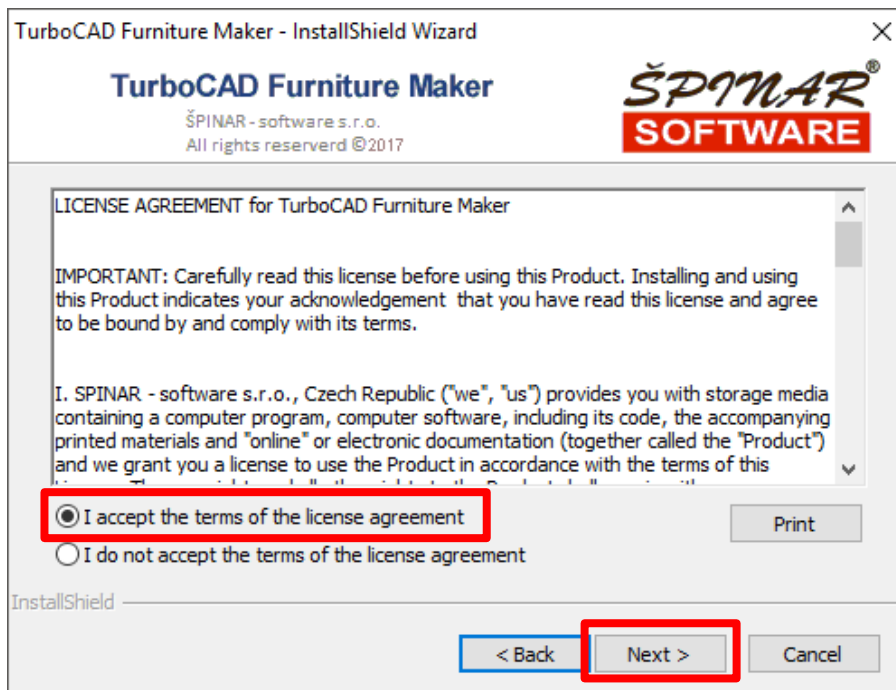

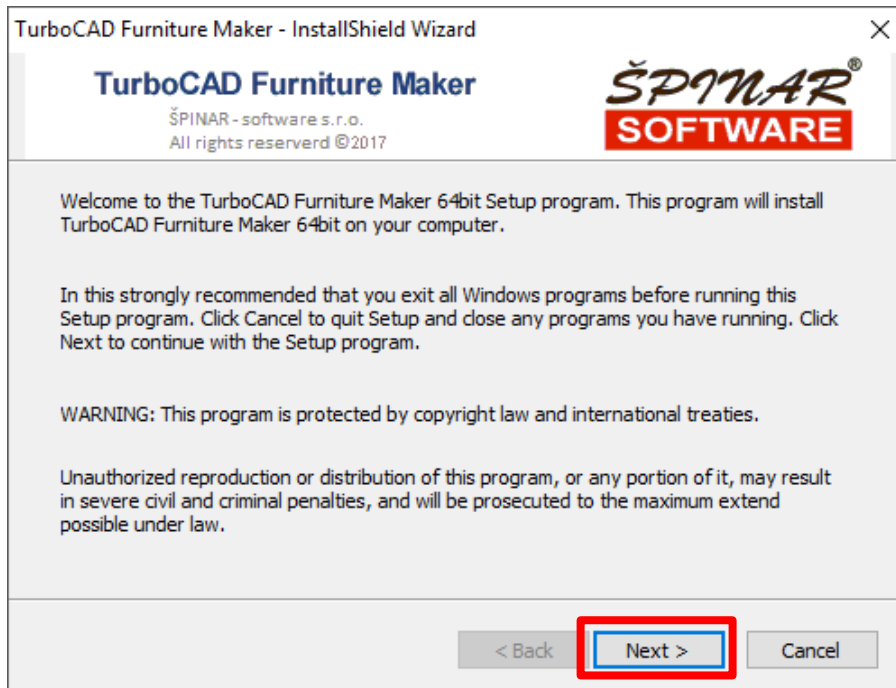

Start the installation files in this order:

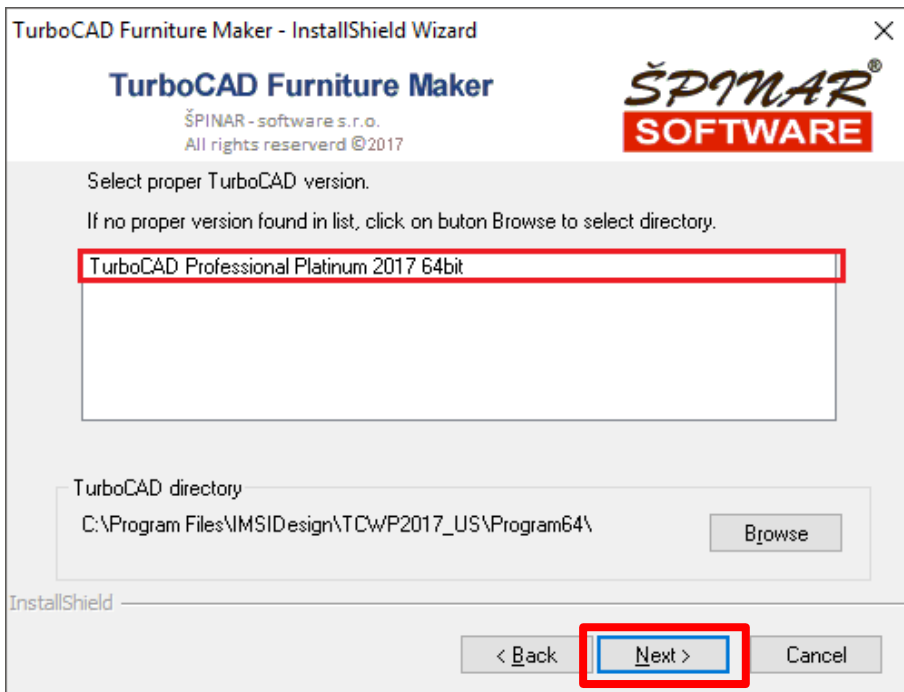

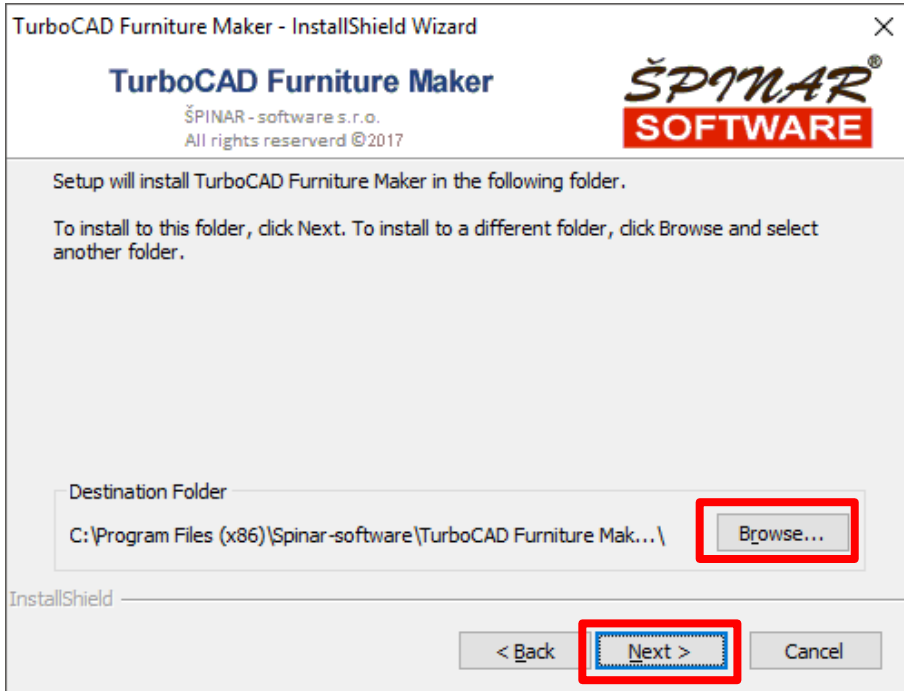

- TurboCAD 2019 x64 * (see note below)
- RwRenderPlugin.exe
- TCFM_20.0_US_setup_64bit.exe

* NOTE: The name of the TurboCAD installation file may be different according to the version of TurboCAD that you are using. For more information, please contact your supplier.

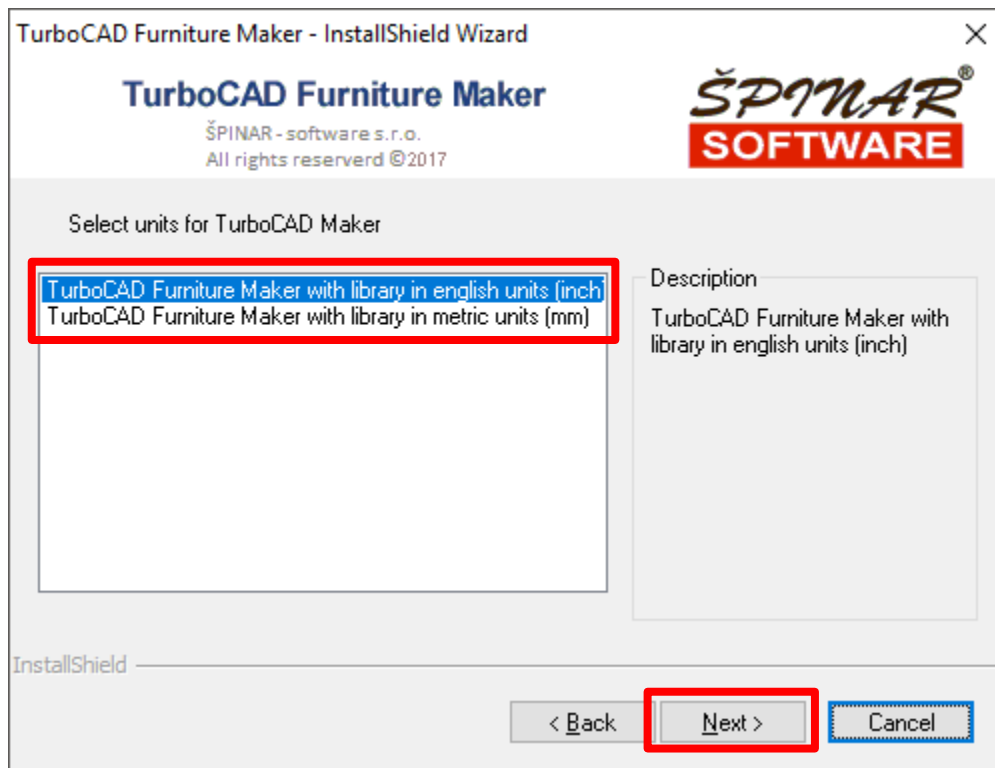

Install [TurboCAD 2019 x64](#) and [RwRenderPlugin](#) first

TCFM_20.0_US_setup_64bit.exe – click by right mouse button and choose “Run as administrator”

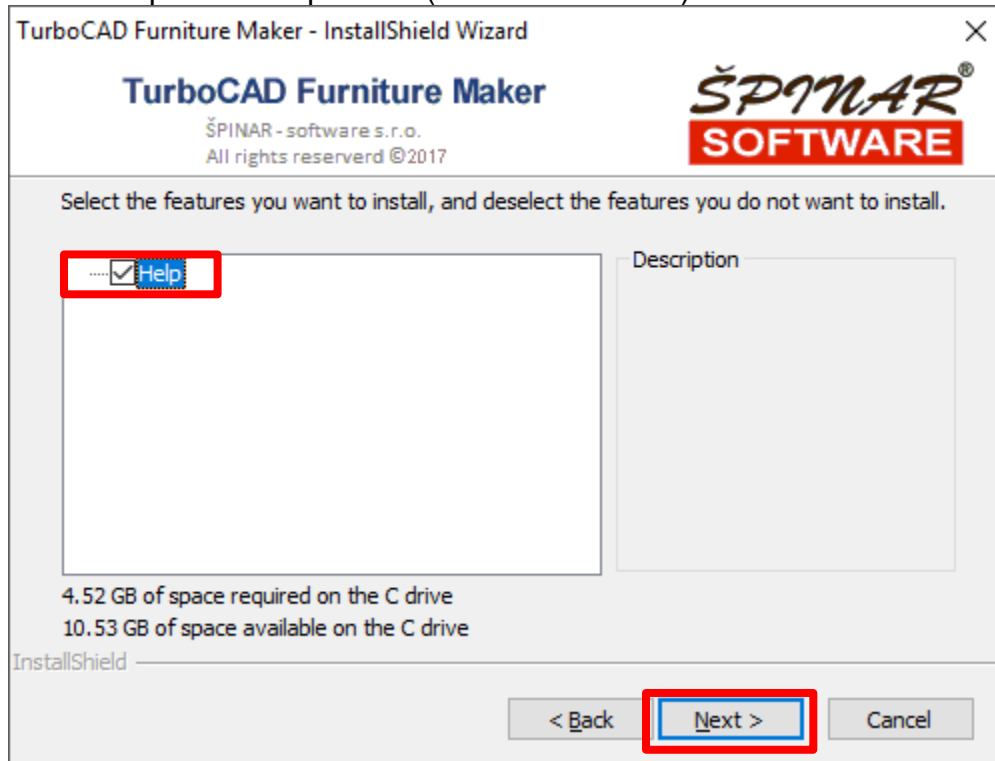

Choose English units or Metric units

Choose Optional components (black checkboxes)
